BOTTOM DROPS FROM THE RISE.

Manhattan Down in Company With Copper.

DECLINES IN STEEL AND IN SUGAR.

Other Stocks Share the Weakness -General Electric Makes an Export Gain-Higher Money Rates an Unfavorable Factor.

NEW YORK, Dec. 6,-The operation of poels in distributing stocks throughout the week and again today, with a number of rumors and prospective unfavorable minor factors, caused a few rather sharp declines this morning and gave an appearance of heaviness and irregularity to the stock market.

There was an irregular opening and a moderate volume of transactions. Overnight there was cabled a firm range of quotations for American stocks in London, while consols advanced 14 per cent on reperis of an early cessation of hostilities in South Africa. This factor was entirely ignored by the local market. Setback Lends to Liquidation.

A sharp setback in Manhattan led to liquidation elsewhere throughout the list, and during the greater part of the morning session the market reflected a declin-ing tendency. At the decline the market hardened and became quite dull, resuming nctivity again at the expense of values. Reports that Mr. Harriman was ill were promptly denied.

The approach of the Amalgamated Cop-

The approach of the Amaigamated cop-per dividend day led to rumors of prob-able unfavorable action and this had a depressing effect on Copper.

Then again, bearishly inclined traders were disposed to take a somewhat dubious view of the monthly outlook, on the prob-ability that the banks and trust com-panies would be compelled to call in loans to meet the heavy January dis-bursements. Call money was firm. The expectation was general that further gold expectation was general that further gold experts would be made next week, and that tomorrow's bank statement would not be encouraging to the speculative

not be encouraging to the speculative situation.

During the week the banks have lost approximately \$7,00,000 on their transactions with the Sub-Treasury, London traded on a small scale only and was not a factor.

Manbattan Under Pressure.

With the exception of Manhattan, which opened lower, changer at the opening were confined to small fractions. Throughout the morning. Manhattan was under steady pressure from brokers, who have been conspicuous in advancing it to 145. At the same time, while marketing Manhattan, an attempt was made to give an appearance of strength to Missouri Pacific and the report was sent out that the next dividend would be 2½ per cent, or at the rate of 5 per cent a year. Traders on the break in Manhattan took

Traders on the break in Manhattan took the bear side, and the early steadiness gave place to decided weakness. St. Paul was notably weak in the railway list, and Union Pacific was also heavy, notwith-standing unofficial statements of an excellent showing to be made by the company for the year. St. Louis Southwestern issues were weak on small offerings. Attempts were made to railly Amalgamated Councer and American Sugar in the nated Copper and American Sugar in the industrial quarter, but they were only temperarily successful. Copper met liquidation, apparently for the account of Boston Sugar, selling ex-dividend, and on an advance in the refined product, stored an early gain, but could not withstand the weakness elsewhere.

Steel Makes Recessions.

General Electric was advanced 6 per cent on moderate buying, later reacting sharply on the declaration of the usual recovering the lost ground. The Steel Issues, while firm at the opening in symanes, while firm at the epening in sympathy with London, developed weakness on moderate offerings, and not meeting very vigorous support, declined easily.

London's total transactions were about 8,000 shares, mostly purchases, including United States Steel, Southern Pacific, and Baltimore and Obio. There was a considerable foreign demand for the latter. The week's currency movement indicates that the banks have lost \$5,000,000, and the appearance of these figures strengthened the belief that tomorrow's bank statement would abow a shrinkage in surplus reserves.

A Very Wenk Closing.

A Very Wenk Closing.

Renewed weakness in Manhattan and Amalgamated Copper was responsible for further sharp declines and a weak closing. Sentiment was unfavorably affected by the money rates, which showed a ten-dency-to work higher.

Extreme weakness in Amalgamated Copper yesterday afternoon was the fea-ture of the stock market. The evidence of inside support during the past few days of inside support during the past few days had made many ...arket people confident that the slump in the stock was over and that there would be a steady if gradual recovery from the low prices reached early this week. The people that made these predictions, however, were reckoning without sufficient data. Yesterday, if there had been any real inside buying it was discontinued and the stock went off as residue as it has at any time in its as rapidly as it has at any time in its

The low price touched was a fraction below 70 and the close was practically at

the bottom. The lowest previous price had been 71½. The rensen alleged for the selling of the stock was that the directors will meet next week to decide on the dividend to be declared and that there is no certainty that they will continue the recent rate of 6 per cent. It was even asserted in some quarters that the dividend will be passed entirely.

Copper Insettles the Market.

The blind pool character of this company and the new evidences every day that the outside public knows nothing whatever as to its condition naturally have an unsettling effect on the general market. The fact that the public and nome pretty big operators as well, have lost heavily on the stock in its tremen dous decline is another reason why the general market feels the effect of further weakness in it. The market yesterday was decidedly weak, with net losses all over the list, and some of them impor

ant.

There was little disposition anywhere
to buy stocks until after the Copper directors have met and taken action. The professional operators took advantage of this condition of sentiment and helped the downward movement along.

The Bank Statement.

Another cause of uncasiness that undoubtedly contributed materially to the weakness of the market was the condiion of the money market, and the expectation that today's bank statement will be a poor one. The banks have lost to the Sub-Treasury this week several millions of dollars, and their gains from the inof dollars, and their gains from the interior have not been nearly so large if
the experts are correct in their figures.

Unless there has been a material cutting of loans, therefore, it is likely that
the statement will be one of the worst
recently issued, and there is only a fair
prospect that the statement will show a
reduction of the loan account.

The Money Market Tightening

It is said that the proporation for the January disbursements will tend to tight- have been well maintained. The local year, and that there is a likelihood that the succeeding statements will all be

they say, as long as the public does not get into the stock market, and they express the epinion that the public shows not the slightest sign of doing this at present

stock, and the general feeling in the street that a reaction was due. The low price reached was 155 and a fraction, al-most 10 points off from the high of the previous day.

advance has been the result of manipulation largely. Another reason for taking this view is the great prevalence of extremely bullish stories that have been floated within the past two days to get the public interested at the top.

The greater portion of the advance in Manhattan was deserved, perhaps. The company is prosperous, and its future looks bright. An increase in the dividend rate will be made early any local very least.

rate will be made carly next year, in all probability. But the movement was car-ried too far for its health.

The Other Tractions Weak,

The other New York tractions were almost as weak as Manhattan, both delining sharply and closing at the bottom. Nothing new was heard regarding them, and it is fair to assume that they went off in sympathy with Manhattan entirely.

No General Electric "Melon."

Another extreme decline vesterday was that of General Electric. The movement seemed to be similar to that in Manhattan. The stock has advanced in price tan. The stock has advanced in price even more rapidly than the traction accurity, having gained morely 20 points in two weeks. It has advanced more than 100 points during the year 18c1. The top price reached yesterday was 289 the best on record, and an advance of 5 points from the level of the day before. From this price the stock tumbled to 280 and tumbled tumbled to 280 and tumbled t covery was only two points and a

The General Electric people had a meeting resterday and failed to declare the scrip dividend that had been expected. This was the cause of the decline, of course. There is allil excellent reason for believing, however, that the dividend will be given to stockholders in the near than the dividend will be given to stockholders in the near than the dividend will be given to stockholders in the near than the dividend will be given to stockholders in the near than the dividend will be given to stockholders in the near than the dividend will be given to stockholders in the near than the dividend will be given to stockholders in the near than the dividend will be given to stockholders in the near than the dividend will be given to stockholders in the near than the dividend will be given to stockholders in the near than the dividend will be given to stockholders in the near than the dividend will be given to stockholders in the near than the dividend will be given to stock the near than th

Missouri Pacific's Presperity.

Missouri Pacific was one of the newsfeatures of the market, though it, with the entire list, had some decline. There is manipulation in this stock, as there is taken or contingent for; in Manhattan, and there are evidences [603,201, this offs.] that it is by the same parties. In this case, too, there is a duais of prosperity beautiful undetectable, painter. Dis L son which to manipulate, and the only thing that need trouble the public is FULL MISS and Turole mits to here. whether the manipulators will carry the

pame too far.

It is said by officers of the company that he estainer confines very heavy, and that the fatture of the corn crop is having and all have very little effect on he showing of business to be made. ing and will have very little effect on the showing of business to be made.

Net | as much, if not more, this year than it did last. He says that the comparatively small increase in net earnings made in October was due to the fact that the October earnings last year were especially heavy, the best on record, in fact. eral market yesterday, but it is not thought that they are likely to decline much further unless the market devel-

THE CHICAGO STOCK MARKET. Wheat Prices Well Maintained De-

spite a Benrish Sent'ment. CHICAGO, Dec. 5 - Although there was less excitement and the volume of business in wheat was not so large, prices money from now until the end of the talent were more bearishly inclined, but were nervous, and ran quickly on their short sales. Commission houses were on both sides, selling on the bulges and buythe succeeding statements will all be poor.

The miligating circumstance in the situation is that there will be no gold exports if money rates advance on this side. Conservative people say that there is no cause for alarm in the outlook. There will be money enough to go around, they say, as long as the public does not get into the stock market, and they expect the stock market, and they expect to millers. The lines was strong. they say, as long as the public does not get into the stock market, and they express the opinion that the public shows not the slightest sign of doing this at present.

Manhattan Breaks Sharply.

Manhattan was as weak at Amalgamated Copper, but its break had little effect on the general market, because of the recent remarkable edvance of the stock, and the general feeling in the street that a reaction was due. The low price reached was 155 and a fraction, ailocal short selling in the last hour, in an ticination of much heavier deliveries. Re-ceipts were 190 cars, with 125 estimated. There was little recovery from the bottom level, and it was said to be not unlikely that a further decline would occur this morning as a result of the break. The slump in the stock confirmed the opinion generally helf recently that its advance has been the result of manipulation largely. Another reason for taking this view is the great prevalence of extending the stimulated.

Conts were 190 cars, with 125 estimated. Onts were netive and nervous, with rapid and broad fluctuations. The trade was a light cash demand today, 75,000 bushels sold to go Kast. Up to the present inner there is no indication of the leading long interest having sold. Country acceptances are fair. Receipts were 214 cars with 195 estimated.

acceptances are fair. Receipts were 214 cars, with 195 estimated.
Provisions were active and higher, closing firm at fair advances. One of the largest local packers led in the buying of lard, and there was a good general demand, especially for pork. The selling was largely to take profits, with the English houses the most conspicuous on this side. Cosh trade was fairly most this side. Cash trade was fairly good.

WELL AGAIN.

The many friends of John Blount will be p to learn that he has entirely recovered for attack of themselsen. Chamberlain's Pain cured him after the best doctors in the where he lives (Monon, Int.) had failed to where he lives (Monon, Ind) had failed to relief. The prompt relief from pain which lighment affords is alone worth many times cost. If troubled with rheumstic pains, I aboutder, Jame back, or stiff joints, give it trial and you are certain to be delighted to the prompt cure which it will effect.
